

### Core Design Philosophy:

**Simplicity • Portability • Comfort • Quality • Style**

You've already got your hands full with leashes and dog toys when out with your canine companion... that's why we created the **NEOSLING™** to carry your H2O4K9™ dog water bottle.

The **NEOSLING™** is a stylish, comfortable, and convenient way to carry water for you or your dog wherever you go. The **NEOSLING™** was designed to hold all popular stainless steel bottles, as well as sports drinks or other popular beverages.

With a wide, soft neoprene strap, the **NEOSLING™** fits comfortably over the shoulder, without digging in or chafing. The adjustable strap allows for a custom fit to accommodate all body types.

The neoprene material in the **NEOSLING™** insulates bottles in all seasons from heat or cold, keeping your water or beverage at the temperature you expect it to be for up to four hours.

The **NEOSLING™** is an easy crossover product for retailers who also offer products in the Athletic/Outdoor Gear & Apparel Industry.
