

H₂O4K9™

EVERY DOG NEEDS WATER

Competitive Comparison

From our research we have found that there are three distinct types of portable dog watering products currently available.

Type I - Plastic Adapters for use with disposable water bottles

Advantages:

- Inexpensive to buy the adapter
- Adapter packs easily

Disadvantages:

- Requires additional purchase of disposable water bottles for each use.
- Does not fit a dog's natural drinking style.
- Adds to the waste in landfills.

Type II - Collapsible Bowls - Fabric or Silicone

Advantages:

- Lightweight
- Portable
- Some products are stylish

Disadvantages:

- A separate water container must be carried or a water source must be found to use the product.
- Product must be dried or packed wet after each use.
- The liners in the fabric bowls can tear.

Type III - Plastic bottle & bowl combination products

Advantages:

- No separate water source or container is necessary
- Portable
- Depending on size and shape, some models are lightweight

Disadvantages:

- Lightweight plastic materials break easily at hinge points
- Not aesthetically pleasing or stylish
- The drinking trough/bowl can break when dropped
- Some models are large and bulky to carry

The H2O4K9™ Advantage

Inspired by the advantages of current portable dog watering products on the market, H2O4K9™ eliminated the disadvantages, while adding unique, stylish and functional concepts:

- Sleek Design • Bold Colors • Unique Lid is the Bowl • Durable Materials for Rugged Use

No other portable dog watering product achieves all of our value added characteristics, making H2O4K9™ the best portable dog watering product on the market.

- The only stainless steel water bottle specifically designed for a dogs natural drinking style.
